

■ ■ Licensing & Authorship Declaration

Bitcoin Original Archive (2008–2009)

Date: July 04, 2025

This document certifies that the attached archive:

Bitcoin_Original_Archive_2008_2009.zip

is an original work authored and cryptographically notarized by:

Manuel J. Nieves (aka Satoshi Norkomoto)

GPG Fingerprint: B4EC 7343 AB0D BF24

The archive contains early source code and documentation for the Bitcoin protocol, including but not limited to:

- main.cpp, key.cpp, init.cpp, rpcwallet.cpp, irc.cpp
- AUTHENTICITY.md, AUTHORS.md, REATTRIBUTION.md
- License headers and authorship declaration files

The SHA256 hash of the archive is:

c465b0aa499e4636c8c050794940593a66de5812abad9857267adcaa587c83a5

This archive represents foundational code and documentation created and distributed prior to the public launch of the Bitcoin blockchain.

All reuse, modification, or redistribution of this archive or its derivatives must be licensed directly from the author. Violations will be prosecuted.

- 17 U.S. Code § 102 – Original works of authorship
- 17 U.S. Code § 1201 – Circumvention of technological measures

This declaration is signed and preserved as part of the public authorship and licensing enforcement campaign launched in 2025.
